#### **Care Management of a Pre-existing Condition**

The World Bronze and the World Silver Plans offer coverage for acute medical conditions only. The plans offer benefits to cover the member in the event of an unfortunate emergency visit to the hospital and if he/she suffers a medical condition that requires surgery. The follow up visits may be covered on an outpatient basis if the outpatient option has been purchased.

The World Gold and Platinum Plans offer Care Management for certain medical conditions. WellAway Limited's underwriting team will evaluate the individual's medical history and take appropriate action based on the prognosis of the conditions declared. The enrollment or application form may be accepted or declined for coverage.

Note: Combinations of conditions and/or medications may result in a decline. In certain instances, if a member declares 3 or more preexisting conditions, it may result in an automatic decline. Providing accurate information on the application form will facilitate the decision more efficiently.

The World Gold and World Platinum Plans offer management of pre-existing conditions coverage for the following conditions:

- acne
- · allergies
- arthritis (not rheumatoid)
- asthma
- bronchitis
- cholesterol
- constipation
- diabetes type 2

- · gastritis (not related to GERD)
- gout
- headaches/migraines
- hypertension
- hypothyroidism
- · restless leg syndrome
- rosacea
- sinusitis

#### What does Care Management of a pre-existing condition mean in reference to the list above?

Care Management of a pre-existing condition means to visit the healthcare professional for the management of the health condition, take medicine regularly if required and follow your doctor's or healthcare professional's instructions carefully. Always ask questions if the member does not understand something and never stop taking any medicine without talking to the doctor first. Under the Care Management of a pre-existing condition, the member has access to the following services: (i) may schedule up to 6 visits a year with a Primary Care Physician; (ii) has availability to 6 Specialist visits per policy year for the Care Management of medical conditions covered under the plan; (iii) may have access to the use of certain outpatient generic medications; and (iv) basic diagnostics. All other services related to these conditions are excluded from coverage. The member can help their pre-existing condition by being physically active, eating healthy diet, and making other lifestyle changes.
